Subject: Fewer fee on E.V.s
Date: Saturday, 17 August 2019 11:38:32 AM

Please let us be able to afford to purchase electric vehicles by placing fewer, or no fees on the importing and licensing of these vehicles.

I think that petrol should cost four times what it does now.

That would be impossible for pragmatic reasons.

However, stopping subsidies on coal and petroleum would start the increase in cost, and these subsidies could then be applied to renewable energy businesses.

Thanks.

Beth Lawrence
