Subject: Moving to electric vehicles
Date: Monday, 19 August 2019 12:51:31 PM

I drive an electric car and ride an electric bike. I support the incentive approach to encourage greater use of electric vehicles so as to reduce CO2 emissions.
We need to act now to address climate change and the vehicle fleet is an important component of doing so.
I would also encourage a better network of charging stations for electric vehicles.
