---

Hi,

I don't have time to do a full submission on this, but the one obvious thing this is missing is that this only deals with cars, trucks etc.

Why not take a small chunk of the funds generated and discount e-bikes? These are electric vehicles that don't get caught in congestion. Imagine what \$500 or \$1000 off would do to uptake rates. They also have much lower environmental impact and way better health impacts (mental and physical) for the user. Plus, more motivation for better cycling infrastructure.

Thanks!  
Jonathan
